

## **2010 Professional & Educational Development Program**

### **Dyslexia in Brief**

**Dr Daryl Greaves**

**TPTC, BA, B Ed, PG Dip Ed Admin, MA, PhD, MAPs**

Participants will obtain an understanding of dyslexia, as well as other issues such as auditory processing, visual processing, motor coordination and organisation disorders, through examining case studies. Phonological processing will be also studied through viewing functional brain scans.

#### **About Daryl:**

An Educational Psychologist and specialist in Specific Learning Disabilities (SPELD), Daryl's credentials include Senior Lecturer at Melbourne University. He has extensively researched SPELD as well as trained teachers in all aspects of SPELD. Daryl was a major contributor in the Commonwealth Government's 'Mapping the Territory' which provides a national picture of how students with learning difficulties are supported in their literacy and numeracy learning in regular school settings, as well as identification successful strategies.
